

Undercounter **QQI DISHWASHERS**

Glass and Dishes

Advantages of REDFOX QQI dishwashers

Stainless steel chamber with rounded corners

Easy cleaning and hygienic maintenance.

Pressed basket holders

The patented technology of pressed holders guarantees even better hygiene.

Combined wash and rinse arm

The new composite arm combines the washing and rinsing functions, ensuring an uninterrupted water jet and saving water thanks to precisely shaped nozzles.

Easy arm removal

The arm is also attached with a single screw, making it easy to remove for cleaning. The screw is secured with a safety catch to prevent it from falling off.

Drain pump (optional)

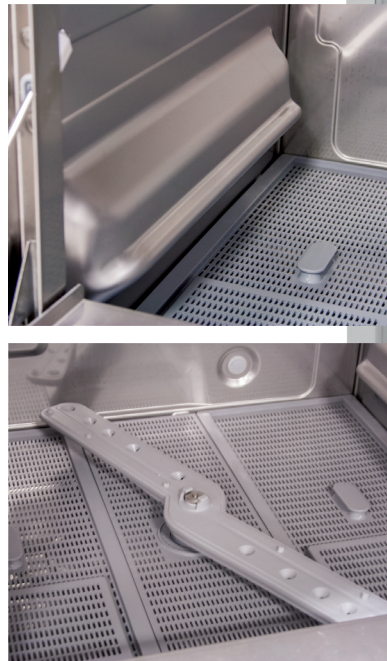

Dishwashers with a drain pump have a controlled discharge of waste water before starting the rinse, which ensures the most efficient exchange of water in the washing bath.

EvoLution 3

Partial controlled drain system to slow down the process of water contamination in the wash bath. This system can be found on QQI dishwashers with a built-in drain pump.

ArchiMedes drain filter

A unique filter that increases water purification efficiency from 62% to 83%. Comes as standard on all QQI dishwashers.

Save up to € 403* per year

on water heating, detergents, rinse aids, sewage and water

Savings and sustainability

Thanks to advanced technologies such as the patented DuoFlow two-way pump and the sophisticated water exchange system with the Archimedes filter, you will save an average of:

- **8 681 liters** of water per year
- **227 Euros** in water heating costs
- **176 Euros** for detergents and rinse aids

**2,1 l/
cycle**

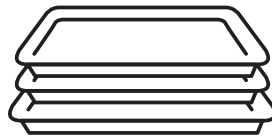

Average cost savings have been calculated by comparing our QQI undercounter dishwasher with seven competing brands. The comparison is based on 50 washing cycles per day, 320 days per year, with an inlet water temperature of 15 °C. The calculation uses the following cost assumptions: electricity at 0.25 EUR/kWh, water and sewage at 5.00 EUR/m³, rinse aid at 6.00 EUR/l, and detergent at 5.40 EUR/kg. Under these conditions, the QQI dishwasher delivers annual savings ranging from 200 to 900 EUR compared to other competing models.

Extra large plates and glasses are no problem

The 365mm door height allows maximum flexibility when loading dishes into the dishwasher.

In addition to large plates and glasses, you can also wash GN containers and baking sheets.

GN 1/1

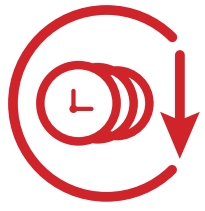

Max height 325 mm

ø 360 mm

Designed for maximum dishwashing performance and efficiency

The extra power enables the fastest washing cycle of just 60 seconds, allowing you to handle up to 840 plates per hour.

Quiet operation for a Comfortable Cafe and Restaurant Atmosphere

Low noise level, which reaches a maximum of 59 dB, it is an ideal partner for quiet restaurants and cafes.
